## FM05 TRANSMITTER

Shown actual size:  
5/8" X 1 1/2"

**The 512 Hz FM05 Transmitter Kit.** This stainless steel "brother" of our original FM05 Transmitter has teamed up with the best reel of wire-wound cable we could find to give you distance and flexibility when locating in small lines. This system also answers our customers' requests for a system that will locate through P-traps. Uses for the FM05 Transmitter Kit don't stop there—imagine where you can go with this tiny giant of a tool—locating through cast iron or plastic lines down to 3/4 of an inch or 1 1/2 inch P-traps. Water-resistant and designed to work best with Prototek receivers at the industry standard 512 Hz.

**Check out our Web site or call us about Prototek receivers for use with the FM05 Transmitter Kit.**

We'll give you all the information you need to get you started or upgrade the system you have.

**Specifications for both FM05 Transmitters**

- Frequency: 512 Hz. Compatible with all 512 Hz receivers
- Size: 5/8 inch X 1 1/2 inches
