MOLE TWIN WHEELED CRAWLER

General Description

The Mole twin crawler is the smallest twin engine member of a family of 3 robust wheeled camera crawlers. Pipe diameters from 4" to 12" are possible with the use of various sizes of solid or pneumatic wheels and spacers. The camera carries a built in high resolution color camera and lights, and best suited for lateral lines. For 6" and larger pipe see the Gopher wheeled crawler, and for 8" and larger or steerable applications see the Wolverine crawler.
