

General Description

The Lift Winch is designed to provide easy launch and retrieval of camera crawlers. The winch features a rugged epoxy powder coated frame with 12 volt which motor and 30 foot stainless steel cable. There is a hand held pendant for controlling the up/down movement of the winch cable.

The detachable lift pouch provides a simple yet durable lifting sling that contours to the crawler body and tires to firmly hold it in place during lifting, yet will unwrap into the pipe inverter to allow the crawler to drive out and exit into the sewer pipe or return into the pouch for easy retrieval. Mounts are available to attach the lift winch to cable reels or vehicle chassis as required..
